# Shopping centre with LEED Gold certification.

A striking element has been constructed on the north-western façade, along Ocelářská Street: a ramp that optically links the area in front of the main Ocelářská Street entrance with the green roof.

Food courts on the top floor with seating arrangements on the bridges provide visitors with a unique view of the green roof, which is designed as a public-access park offering various recreation and entertainment possibilities. These include a children's playground, dinosaur park, ice-skating rink and a park with water elements.

Directly connected to the shopping centre is an impressive office building incorporating almost 20,000m<sup>2</sup> of lettable area. The office building comprises east and west wings with a connecting central building. The west wing is lower than the east wing by one storey, and the top floor has been constructed in steps. The roof of the west wing contains a terrace.

This includes another example of the interesting and unconventional execution of the façade: a modular design glass façade. The individual modules, measuring 2.7m x 3.5m, were prefabricated and attached to the prepared construction with the aid of a crane. This method made it possible for the glazing of the 13-storey property to be completed within three months. The floor plan of the office building offers a high degree of flexibility, from spacious open-plan offices to individual office spaces. All areas are completely climate-controlled.

# Impressions

## Image notes

1

A modern-style shopping temple.

2

Modern shopping centre in Prague.

The glass façade of Galerie Harfa is decorated with black and white trees.

The Galerie Harfa is equipped with a large and spacious car park.

**All the brands under one roof.**
