New splendour for Prague's oldest athletic club.

After the synthetic surface was laid, the lanes for the individual sporting disciplines were marked according to the client's specifications. At the same time, the edges of the track were repaired, the soil built up and lawn seed planted.

A water-permeable, dual-layer polyurethane surface from Stockmeier Urethanes was used in the renovation of the athletics oval, which satisfied all the IAAF criteria and EN 14877 standards.
